BEFORE

AFTER

The Los Alamos Site Office is pleased to announce the completion of the Technical Area 73 Landfill Closure and Airport Improvement Project and requests the pleasure of your attendance at the ribbon cutting ceremony on May 22, 2007. Our team, led by North Wind Inc., successfully completed a unique environmental restoration for the closure of the landfill and provided significant improvements to the Los Alamos County Airport through the closure design. This project was completed on schedule to meet the New Mexico Environment Department Order on Consent milestone despite some unique design challenges and extreme weather conditions throughout the 2006 construction season.

Please join us in celebrating this extraordinary achievement!

You are cordially invited to attend the ribbon cutting ceremony for the Los Alamos Airport Landfill project on Tuesday, May 22, 2007 at 10:30 am
